PROFILE

EXPERIENCE

MUCH MORE DETAIL IS AVAILABLE ON [MY WEBSITE](#).

Runner for RED-d Awareness Film Shoot – 2026

I was invited along a professional film shoot raising awareness of how freelance dancers are treated, where my main work was just to help out rigging lights and cameras, prepping drinks and meals, and even get involved in some filming. I learnt a wealth of information on how a shoot like this is structured, also teaching me the practical side of work like this. I loved it.

Promotional Films for St John's Hampton Wick Church – 2025-present

My local church, St John's Hampton Wick, has frequently used me for videography and photography projects. I have made three videos for the Youth, two for our Love Local Projects, two for our church camp Focus, and many other pieces of work like a seven-piece series called Rise and Reflect, nineteen short clips of sermons for social media, and a video showing our church's Easter activities.

Marketing Photography for Imm-Aroy restaurant in Chinatown, London - 2025

Photographed dishes for the menu and social media presence of my friend's restaurant in Chinatown, Imm-Aroy, complete from planning to setting up shots and grading.

Design and Selling of Christian Youth Journals – 2023-4

Designed a set of Youth Journals for my church's youth group, from vision and planning, to design, sale and distribution.

Promotional Film for Red Robin Art Studio, London – 2023

Made a short film to showcase Red Robin Art Studio London on their website and social media.

Promotional Film for Chanctonbury Church – 2022

Chanctonbury Church were doing a Mission Day, and I made a film for them to show on social media and on some Sundays what they get up to over the course of the day.

EDUCATION

Hampton School, London - Currently about to begin A-Levels (*Mathematics, Physics, Computer Science, and French DELF program*)

SKILLS

Linguistics

I have a passion for language - speaking C1-level Italian and B2-level French, I achieved a Grade 9 in both Latin GCSE and Italian GCSE a year early and am predicted a Grade 9 in Classical Greek GCSE. I will be studying French as part of the DELF program next academic year. A year ago I also underwent a school project in which I constructed a fully comprehensive language (see my website) which won the Headmaster's award jointly with three others.

Music

Playing Grade-8 level drums and Grade-4 level piano, music is one of my favourite things to do. I recently performed in my school's Rock Concert, and have been drumming for the local church since 2021, having started drumming before the COVID pandemic. As a result I am well-versed in both band performance and music's theoretical side.

Photography and Videography

As shown above I have always loved being behind a camera, whether capturing stills or forming videos. All of my work I have produced alone, from shot planning to shooting, editing and distributing, having learnt to use industry-standard software such as Adobe Premiere Pro, Photoshop, Lightroom and After Effects. In earlier days I focused on visual effects, and have moved on to freelance promotional work for which I have been paid.

Engineering

A group of friends and I recently participated for the third consecutive year in our school's annual STEM fair, this time winning our category with an AI-powered RC plane. Built from scratch (only excluding the plane's base model, which we then modified in CAD), we constructed a small plane which can drop seeds on fertile soil, using an AI-powered camera and autopilot system to fly itself to where seeds would grow. I was responsible for the seed dispenser's design, mechanism and code, project management, and the auto-stabilisation feature of the autopilot.

Writing

Having written enthusiastically for a while, two years ago I was shortlisted in a national competition with my piece *Florentine Skies* ([linked here](#)). My school releases an annual publication called the Lion Print featuring the school's best writing and art, and my various pieces have regularly featured in them.
